

DrinkDock at a glance

DrinkDock is designing age-verified vending machines for canned beer, seltzer and cocktails. Each machine checks ID on every alcohol sale, takes contactless payment and lowers the can to a lit pickup port, so simple orders at bars, hotels and venues don't wait behind cocktails.

Founded	2026
Headquarters	Philadelphia, Pennsylvania
Founders	Jon Adams, Co-founder and CEO · Erika Smith, Co-founder and COO · Jason Traum, Co-founder and CTO
Products	DrinkDock One (bars and nightlife), DrinkDock Duo (arenas and event halls), DrinkDock Compact (hotels and smaller rooms), and DrinkDock Manager software
Ways to buy	Lease, purchase or event rental
Stage	Forming its first Philadelphia pilot, with first installs planned for 2027. Software prototypes of the guest screen and Manager are live on the website.
Media contact	drinkdockhq@gmail.com

How a sale works

1. Choose Up to two drinks on the touchscreen.	2. Scan ID Back for the barcode, front for the photo match.	3. Tap to pay Contactless card, phone wallet or chip.	4. Pick up The can rides a lift down to a lit port.
--	---	---	---

Built to run inside a liquor license

Two drinks per scan The same ID then waits 20 minutes unless staff reset it.	Staff stay in control Pause all sales, or block a guest's ID from their sale in Manager.
Licensed hours only Sales lock to the venue's licensed hours or an earlier cutoff.	PLCB review first A written advisory opinion is requested for each venue before install.
