EDUCATION

THE WHARTON SCHOOL, UNIVERSITY OF PENNSYLVANIA **Philadelphia, PA**
Master of Business Administration Candidate **2026 – 2028**
Intended Majors: Artificial Intelligence for Business; Operations, Information and Decisions. GMAT Focus: 775 (100th percentile)
Director of Marketing & Community, Wharton AI & Analytics Club; Run Captain, Wharton Run & Tri Club

BROWN UNIVERSITY **Providence, RI**
Bachelor of Science, Applied Mathematics – Economics (Mathematical Finance) **2017 – 2020**
GPA: 3.94

EXPERIENCE

MORGAN STANLEY, GLOBAL INVESTMENT OFFICE **New York, NY**
Investment Strategist, Portfolio Construction & Cross-Asset Strategy **2023 – 2026**

- Led team adoption of GenAI for research, brainstorming, and drafting; developed AI tools with teammates for chartbook conversion, chart ideas from news and advisor feedback, and a house-style writing assistant used by ~20 colleagues; member of the AI working group, utilization committees, and AI hackathon team.
- Authored daily market commentary for ~25,000 financial advisors on a $5T wealth platform and contributed to monthly reports and whitepapers; redesigned the research format, shortening length ~30%.
- Designed and implemented a VBA analytics pipeline automating 1,000+ slides and 4,000+ data fields across Bloomberg, FactSet, and internal systems; led the team through implementation, introduced validation controls, and cut monthly turnaround from ~10 to ~3 days; still in production.
- Conducted quantitative research, co-developing a regime-switching stock-vs-bond indicator and tactical fixed-income framework with out-of-sample validation, adopted by several teams; researched alternative asset classes (cryptocurrency, fine art, residential real estate) to update long-term return assumptions and drafted model portfolio allocations across risk profiles; co-developed the Equity Vulnerability Score for single-stock drawdown risk; contributor on published Global Investment Committee research, including the annual Capital Market Assumptions.
- Designed the department's chart color palette, which became the Wealth Management standard.

Portfolio Construction Strategist, Outsourced Chief Investment Office (OCIO) **2022 – 2023**

- Prepared and analyzed trade ideas as part of a centralized investment team supporting $70B in AUM (endowments, foundations, UHNW, pensions, and public entities); sized positioning across 30+ model portfolios, performed scenario/stress tests, and framed investment committee proposals and client-ready summaries.
- Rebuilt trade analytics to update sector weights, style tilts, and factor exposures instantly, reducing trade-impact evaluation from hours to minutes; developed and maintained dashboards to track portfolio changes and key risk metrics over time and produced board-ready attribution and positioning views for quarterly client reviews.
- Replaced assigned style buckets with data-driven style scores, revealing that all active managers had independently underweighted the Magnificent 7, leading to over half of one quarter's underperformance.
- Engineered data pipelines and analytics for a newly onboarded, externally custodied institutional client, consolidating positions and performance into portfolio views used for remediation, audit, oversight, and quarterly board materials.

GUGGENHEIM PARTNERS **New York, NY**
Investment Analyst, Portfolio Construction Group **2020 – 2022**

- Constructed and optimized multi-asset fixed income model portfolios for institutional clients within a $270B AUM platform; ran Monte Carlo simulations to quantify risk, return, and liquidity trade-offs and presented recommendations to portfolio managers.
- Enhanced and automated monthly analytics (data pulls, cleaning, reconciliation, and reporting), cutting a 24-hour run to 30 minutes and errors by over 95%; built a tool to rerun historical analytics, enabling backtesting and performance attribution.

GOLDMAN SACHS **New York, NY**
Summer Analyst, Market Risk **2019**

- Tracked firm-wide market risk and key exposure deltas. Analyzed hedge-effectiveness for US credit. Received return offer.

ADDITIONAL INFORMATION

Dreamy, AI Running Coach (2026 – Present): Built and shipped an AI running coach with Claude Code that models fitness from training data and rebuilds the week around missed workouts; 14 of 15 beta runners rated it above prior coaches or apps.
Walldrobe (2026 – Present): Building a platform for decorating homes: a custom layout engine reads a photo of a wall and arranges new prints around art the user already owns; live beta.
Technical Skills: Python, SQL, MATLAB, Advanced Excel/PowerPoint VBA, FactSet, Bloomberg, Claude Code.
Run Club: Pace lead for NYC running community; guide group workouts, design routes, and organize special runs and social events.
Brown University: Student Conduct Board; Campus Life Advisory Board; orientation leader; Men's Rugby (USA Rugby Div. 1-AA).
Community & Philanthropy: Raised $11,000 for youth mental health and visually impaired children.
Interests: distance running (3:10 marathon), oil painting, data visualization, building lightweight web apps, skiing, soccer.
