

DrinkDock at a glance

DrinkDock makes age-verified vending machines for canned beer, seltzer and cocktails. Each machine scans ID on every alcohol sale, takes contactless payment and lowers the can to a lit pickup port, so bars, hotels and venues can sell simple orders at the peak without adding staff.

Founded	2026
Headquarters	Philadelphia, Pennsylvania
Founders	Jon Adams, Co-founder and CEO · Erika Smith, Co-founder and COO · Jason Traum, Co-founder and CTO
Products	DrinkDock One (bars and nightlife), DrinkDock Duo (stadiums, arenas and event halls), DrinkDock Compact (hotels, pools and rooftops), and DrinkDock Manager software
Ways to buy	Lease, purchase or event rental
Availability	Scheduling Pennsylvania installations for Q1 2027, starting in the Philadelphia area
Media contact	drinkdockhq@gmail.com

How a sale works

1. Choose

Up to two drinks on the touchscreen.

2. Scan ID

A U.S. driver's license or state ID, validated before payment opens.

3. Tap to pay

Contactless card, phone wallet or chip.

4. Pick up

The can rides a lift down to a lit port.

Built to run inside a liquor license

Two drinks per scan

The same ID then waits 20 minutes unless staff reset it.

Licensed hours only

Sales lock to the venue's licensed hours or an earlier cutoff.

Staff stay in control

Pause all sales or lock out an ID with one tap in Manager.

PLCB review first

A written advisory opinion is requested before every install.
